

Oxyle is a game-changing cleantech start-up located in Zürich. Our mission is to revolutionize wastewater treatment to address the ever-increasing accumulation of toxic micropollutants like biocides, hormones, pharmaceuticals, and industrial chemicals in our precious bodies of water and our ecosystems using our efficient & sustainable treatment. We are a passionate and dynamic team, committed to protecting the health of our bodies of water. Join us in our mission to eliminate discharge of toxic pollutants into our environment.

We are hiring!

Product Development Intern

Internship 6 Months, 80-100%, Zürich

Your responsibilities

- ✦ Design and modelling of wastewater treatment systems.
- ✦ Construction and assembling of reactor prototypes.
- ✦ Programming and testing of reactor control schemes.
- ✦ Evaluation of sensor systems for reactor control.
- ✦ In-depth testing and verification of the newly developed systems.

Your profile

- ✦ BSc or MSc in mechanical, process or electrical engineering.
- ✦ Skilled with CAD, prototyping techniques, and control/PLC programming.
- ✦ Experience with prototyping and industrial product design.
- ✦ Hands-on working style and goal oriented.
- ✦ Team-player and impact-driven person with passion for innovation.
- ✦ Fluent in spoken and written English.

What we offer

- ✦ A passionate and dynamic team to share the journey of growing a high-impact start-up.
- ✦ A sustainable company with a vision for creating a positive impact on humans and our environment.
- ✦ A great opportunity for an evolving position that lets you shape your work.
- ✦ Possibility of evolving the internship into a permanent full-time position.

Send us your application including a cover letter, your CV, and all other documents that support your application to: jobs@oxyle.ch
